

VALUATION - IFRS (IAS 19) / US-GAAP (ASC 715)

SERVICES

Optimisation, discussion and recommendation of evaluation assumptions

Economic and actuarial assumptions are relevant for the valuation of pension liabilities. We explain the interrelationships and highlight the potential for optimisation.

Actuarial valuation

Valuation of pension benefits (DBO/PBO) and pension costs (service costs) according to the prescribed valuation method.

YOUR BENEFITS, OUR PROMISE

Tried-and-tested, pragmatic solution approach

As an experienced expert with audit actuaries who have an understanding of accounting, c-alm's solution approach is recognised and proven.

Highest level of transparency

Maximum clarity and transparency are ensured by discussion of the assumptions used and the accounting presentation of business transactions.
